MODULE 6: WRITE, REVIEW, EDIT

Module 6 addresses the idea that there is no such thing as a perfect draft. Your team's writing process is unique and should rely on each member's strengths.

There Is No Perfect Draft

As you start thinking about writing, you should be reminded that there is no perfect time to start writing. But once you start writing, you may feel inspired to continue.

This may be a helpful affirmation to repeat to yourself as you write:

A good draft is a finished draft.

If you need support writing your assigned section or part, you can look at examples from your chosen publication venue.

- For example, how are introduction sections usually written?
- Are there similarities in how they are written and what words are used?
- From your writing team, who can you ask to support your writing process?

Most importantly, all authors on a dissemination product have the right to express their concerns and to review and agree on all changes.

Collaborative writing can be tricky, but each member of your team has unique expertise and lived experience that can support your own writing process. **Rely on your teammates.**

REFLECTIVE QUESTION

Revising several times can feel overwhelming. How can you support your fellow writers with their revisions?

ABOUT CEACR:

The Community Engagement Alliance Consultative Resource (CEACR) serves as a channel for community-engaged best practices to research teams wanting to apply principles of community-engaged approaches to address differences in health outcomes and encourage participation in research programs.
